

Citizen Science Scoping Workshop-2023

Date and Time: 25 January 2023, 13:30-15:00 Hrs CET

Objective:

To discuss the potential of citizen science activities in developing an observing system and how these observations can be useful for cal/val activities for researchers.

Our scoping workshop will deliver a summary of citizen science observations and efforts within the Svalbard science community.

Help us:

Please fill in this 5-minute survey to know our audience before the workshop:
